INDEX OF INDUSTRIAL PRODUCTION 2001

(BASE YEAR – 1993-94)

**DIRECTORATE OF ECONOMICS & STATISTICS,
RAJASTHAN, JAIPUR.**

Government of Rajasthan

**INDEX
OF
INDUSTRIAL PRODUCTION
2001**

(BASE YEAR – 1993-94)

DIRECTORATE OF ECONOMICS & STATISTICS,
RAJASTHAN, JAIPUR.

PREFACE

In order to study the growth of industrial sector over a period of time, the Directorate of Economics & Statistics, Govt. of Rajasthan have regularly compiled the Index of Industrial Production for the state of Rajasthan since 1971.

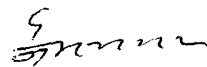

In order to accommodate the changes in the industrial development of the state during the last three decades and to have a comparable month-wise series of State the base year has been shifted to 1993-94 from 1970 on the basis of recommendations of Technical Advisory committee, setup by IIP Unit, Central Statistical Organisation, Ministry of Statistics & Programme Implementation, Govt. of India.

The report on "Index Number of Industrial Production (Base Year 1993-94=100) 2001 has been prepared on the basis of month-wise production data received from various selected industrial units in Rajasthan. This is the first edition of new series in the state.

The report contains month-wise and group-wise index number of Manufacturing Mining & Electricity sectors for the period 2001. Annual average and growth of different sector have also been worked out and incorporated in this period. The report also highlights the methodology used for building up of these indices, allocation of weights and review of findings of the study. I hope this publication would be found useful of Planners, Policy makers, Research scholars and others interested in industrial development in the State.

I am grateful to the management of all concerned factories who extended their co-operation in providing data. I am happy to record my appreciation to the officers and the staff related to this report in the Directorate for their dedicated efforts in coordinating the work and preparation of this report.

Suggestions, if any, for the improvement of coverage of the report will be appreciated.

(N.L.KHINCHI)

Director,
Economics & Statistics
Rajasthan, Jaipur

Jaipur,
Dated: December, 2002.

OFFICERS ASSOCIATED WITH PREPARATION OF THIS REPORT

1	SH. G.C.KARODIWAL	JOINT DIRECTOR

INTRODUCTION

Index of Industrial Production (IIP) is of immense use for measuring the industrial development Index of a State. The index indicates relative change over the time in the volume of production in non-agricultural commodities. At the National level, the index of industrial production is being compiled by the Central Statistical Organisation, Govt. of India and is released on monthly basis. This index, however, does not serve the purpose for evaluating the industrial growth of a State. Therefore, the Directorate of Economics and Statistics has been compiling/releasing the index of industrial production for the State of Rajasthan on monthly/annual basis since 1971.

In the first series, 1970 was the base year for compiling the IIP both by the Central Statistical Organisation & Directorate of Economics and Statistics, Rajasthan. A Technical Advisory Committee (TAC) was constituted by C.S.O., Govt. of India in June, 1995 to formulate guidelines and methodology for preparation of comparable IIP of States/U.Ts. On the basis of recommendation of TAC it was decided to bring forward the base year from 1970 to 1993-94. The terms of reference of the TAC on IIP were modified in November, 1996 to include the revision of the all India IIP as well.

MATHODOLOGY

The state level IIP covers the three major industrial sector viz Manufacturing, Mining & Quarrying and Electricity (Excluding Gas) as is being followed in the all India IIP. For mining and Quarrying sector the item basket and the production data has been supplied by the Indian Bureau of mines, Nagpur, Whereas in the case of Electricity requisite data has been provide by the Central Electricity Authority, New Delhi, through C.S.O. New Delhi.

(I) SELECTION OF ITEM BASKET FOR MANUFACTURING SECTOR:

Technical Advisory Committee (TAC) has decided that all the items may be arranged in the discending order of value of output and the number of items selected in the State item Basket should be such that about 80% of value of output of State Manufacturing Sector is covered by the selected items. As the selection of the items is the Item Basket had to be done on the basis of ASI 1993-94 (Ex-Factory Value) data which has been supplied by the C.S.O.

The Sector Level and the Item Level Weighting Diagram is based upon the value of output (Ex-Factory Value) of the registered as well as Un-registered manufacturing sector. As per C.S.O. instruction NIC 1987 has been used for preparation of weighting diagrams.

(II) WEIGHTING DIAGRAM:

After the items have been finally selected, the next stage in the construction of the index of industrial production is to determine the weights to be attached to the items included in the items basket to represent the different industries in the base period. In the case the total weight, which is equal to 1000 has been apportioned first to these 3 industrial sector. A sectoral weight has been allocated to its 2-digit industry groups.

(i) ALLOCATION OF WEIGHTS AT THE SECTORAL LEVEL:

For the purpose of compilation of State wise IIP, three Major Industrial Sectors namely (i) Manufacturing (ii) Mining and Quarrying and (iii) Electricity (Excluding Gas) of a State Economy are to be considered. The proportions of Value of output for these sectors has been converted in to sectoral weights, such that their total equals 1000. The value of output figures for the manufacturing sector are to be taken from the ASI Detailed Results 1993-94 which were supplied by CSO where as the value of output figures for the Mining and Quarrying and Electricity sectors have also been supplied by CSO.

(ii) ALLOCATION OF WEIGHTS AT THE 2-DIGIT LEVEL IN THE MANUFACTURING SECTOR:

The next stage is to apportion the sectoral level weight of manufacturing sector to the 2-digit industry groups included in the item basket. The total weight of the manufacturing sector (Registered and Un-Registered) would be apportioned among these 2-digit industry groups in proportion of their value of out put available from the detailed results of ASI 1993-94.

As regards Mining and Quarrying Sector its weight will be apportioned to the items included in the item basket in proportion to their value of output. Since Electricity sector is a single sector, no apportioning of weight is required.

METHOD OF CALCULATION OF IIP:

The Index of Industrial Production is calculated as Weighted Arithmetic Mean of the production relatives in respect of selected items mathematically.

$$I = \frac{\sum R_i \times W_i}{\sum W_i}$$

Where I is the index, R_i is the production relative of item i and W_i is the weight allotted to it.

The production relative (R_i) of ith item for the month has been calculated by using the following formula:

$$R_i = \frac{P_{ic}}{P_{io}} \times 100$$

Where P_{ic} = Production of ith item in the current month/period,

P_{io} = Production of the ith item in the base month/period.

SOURCE OF DATA:

For preparation of the Current Series (Base Year: 1993-94) of Index of Industrial Production, for Rajasthan, initially 369 industrial units have been selected for collection of production data in respect of 138 items. The base year (1993-94) production data in respect of the selected items have been supplied by C.S.O. on the basis of 1993-94 schedules made available by NSSO. Again, for collection of monthly data of the production for the subsequent period i.e. from Jan. 2001 onwards is being obtained directly from the Industrial Units.

The source of Mining Sector data are Indian Bureau of Mines, Nagpur.

The data on Electricity Sector is furnished by Central Electricity Authority through C.S.O.

GENERAL REVIEW:

For the purpose of compiling the index, the industrial sector has been divided into manufacturing, Mining and Electricity sector with the weights of 893.95, 34.25 & 71.92 respectively out of total weight 1000. The manufacturing sector has further, been divided into 16 major industrial groups at 2 digit level.

An analysis of the General Index of the Industrial Production reveals that during year 2001 the monthly Index number stood at 184.64 in the month of October, 2001 which is maximum and 150.73 in the month of August, 2001 which is minimum.

Under the Manufacturing Sector during year 2001 the monthly Index number stood at 183.13 in the month of October, 2001 which is maximum and 150.29 in the month of August, 2001 which is minimum.

Under the Mining Sector during year 2001 the monthly Index number stood at 158.79 in the month of March, 2001 which is maximum and 93.77 in the month of April, 2001 which is minimum.

Under the Electricity Sector during year 2001 the monthly Index number stood at 227.34 in the month of December, 2001 which is maximum and 155.88 in the month of June, 2001 which is minimum.
