PREFACE

The report on "Index Number of Industrial Production 2010 (Base Year 1993-94=100)" has been prepared on the basis of month-wise production data received from various selected industrial units in Rajasthan. The report contains month-wise and group-wise index number of Manufacturing, Mining & Electricity sectors. Annual average of different sector have also been worked out and incorporated in this report. The report also highlights the methodology used for building up these indices and allocation of weights. This is the Tenth report of new series in the State.

It is hoped that the present report on Index of Industrial Production would be found useful by the concerned interested in the study of industrial development of the Rajasthan.

Suggestions, if any, for the improvement of coverage of the report will be appreciated.

INTRODUCTION

Index of Industrial Production (IIP) is of immense use for measuring the industrial development index of a State. The index indicates relative change over the time in the volume of production in non-agricultural commodities. At the National level, the index of industrial production is being compiled by the Central Statistical Organization, Govt. of India and is released on monthly basis. This index, however, does not serve the purpose for evaluating the industrial growth of a State. Therefore, the Directorate of Economics and Statistics has been compiling/releasing the index of industrial production for the State of Rajasthan on monthly/annual basis since 1971.

In the first series, 1970 was the base year for compiling the IIP both by the Central Statistical Organization & Directorate of Economics and Statistics, Rajasthan. A Technical Advisory Committee (TAC) was constituted by C.S.O., Govt. of India in June, 1995 to formulate guidelines and methodology for preparation of comparable IIP of States/U.Ts. On the basis of recommendation of TAC it was decided to bring forward the base year from 1970 to 1993-94. The terms of reference of the TAC on IIP were modified in November, 1996 to include the revision of the all India IIP as well.

METHODOLOGY

The state level IIP covers the three major industrial sectors viz. Manufacturing, Mining & Quarrying and Electricity (Excluding Gas) as is being followed in the all India IIP. For mining and quarrying sector the production data has been supplied by the Indian Bureau of Mines, Nagpur, where as in the case of Electricity requisite data has been provide by the Central Electricity Authority, New Delhi, through C.S.O. New Delhi.

(I) SELECTION OF ITEM BASKET FOR MANUFACTURING SECTOR:

Technical Advisory Committee (TAC) has decided that all the items may be arranged in the descending order of value of output and the number of items selected in the State Item Basket should be such about 80% of value of output of State Manufacturing Sector is covered by the selected items. The selection of the items in the Item Basket was done on the basis of ASI 1993-94 (Ex-Factory Value) supplied by the C.S.O.

The Sector Level and the Item Level Weighting Diagram is based upon the value of output (Ex-Factory Value) of the registered as well as Un-registered manufacturing sector. As per C.S.O. instruction NIC 1987 has been used for preparation of weighting diagram.

(II) WEIGHTIN DIAGRAM:

For the purpose of compilation of State IIP, three Major Industrial Sectors namely (i) Manufacturing (ii) Mining and Quarrying and (iii) Electricity (Excluding Gas) were considered. The proportions of value of output for these sectors were converted in to sector weights, such that their total equals 1000. The value of output figures for the manufacturing sector were taken from the ASI Detailed Results 1993-94 which were supplied by CSO where as the value of output figures for the Mining and Quarrying and Electricity sectors were supplied by IBM, Nagpur and CSO respectively.

The total weight of the manufacturing sector (Registered and Un-Registered) was apportioned among the 2-digit industry groups in proportion of their value of output available from the detailed results of ASI 1993-94.

As regards Mining and Quarrying Sector its weight was apportioned to the items included in the item basket in proportion to their value of output. Since Electricity sector is a single sector, no apportioning of weight is required.

METHOD OF CALCULATION OF IIP:

The monthly Index of Industrial Production is calculated as Weighted Arithmetic Mean of the production relatives in respect of selected items as follows:

$$I = \frac{\sum R_i \times W_i}{\sum W_i}$$

Where I is the index, R_i is the production relative of item i th and W_i is the

weight allotted to it.

The production relative (R_i) of i th item for the month has been calculated by using the following formula:

$$R_i = \frac{P_{ic}}{P_{io}} \times 100$$

Where P_{ic} = Production of i th item in the current month,

P_{io} = Production of the i th item in the base month.

Annual Index of Industrial Production is calculated as arithmetic average of monthly indices.

SOURCE OF DATA:

For preparation of the Current Series (Base Year: 1993-94) of index of Industrial Production, for Rajasthan, initially 369 industrial units have been selected for collection of production data in respect of 138 items. The base year (1993-94) production data in respect of the selected items have been supplied by C.S.O. on the basis of 1993-94 schedules made available by NSSO. The monthly data of the production for the subsequent period i.e. from 2001 onwards is being obtained directly from the Industrial Units.

The source of Mining Sector data is the Indian Bureau of Mines, Nagpur, and for the Electricity Sector generation figures furnished by the Central Electricity Authority through C.S.O.
