INDEX OF INDUSTRIAL PRODUCTION (IIP) 2017-18

(BASE YEAR- 2011-12)

DIRECTORATE OF ECONOMICS & STATISTICS,
DEPARTMENT OF PLANNING
RAJASTHAN, JAIPUR

Government of Rajasthan

**INDEX
OF
INDUSTRIAL
PRODUCTION
(IIP)
2017-18**

(BASE YEAR- 2011-12)

Directorate of Economics & Statistics,
Department of Planning Rajasthan, Jaipur

Chief Secretary
Government of Rajasthan

MESSAGE

Index of Industrial Production (IIP) is brought out by the Directorate of Economics & Statistics every year. "Index of Industrial Production" 2017-18 (IIP) is a short-term micro economic indicator provides a bird's eye view of the industrial growth for the State. The publication shows the trend of growth of industrial sectors by index at major industrial group level of NIC-2008 classification.

I believe, this publication would prove useful to the Government departments, planners, industrialists and researchers who are interested in the field of industrial development.

(D.B. Gupta)

Jaipur

November, 2019

Director and Joint Secretary
Directorate of Economics and Statistics
Department of Planning, Rajasthan

Introduction

The report on “Index of Industrial Production 2017 (Base Year 2011-12)” has been prepared on the basis of month-wise production data received from various selected industrial units in Rajasthan. The report contains month-wise and group-wise index of Manufacturing, Mining & Electricity sectors. This publication shows the trend of growth of industrial sector by index at major industrial group level of NIC-2008.

I would like to thank all the officials for their dedicated efforts in preparation of this publication.

Suggestions for further improvement are most welcome.

(Dr. Om Prakash Bairwa)

INTRODUCTION

INTRODUCTION

Index of Industrial Production (IIP) is of immense use for measuring the industrial development index of a State. The index indicates relative change over the time in the volume of production in non-agricultural commodities. At the National level, the index of industrial production is being compiled by the Central Statistical Office, Govt. of India and is released on monthly basis. This index, however, does not serve the purpose for evaluating the industrial growth of a State. Therefore, the Directorate of Economics and Statistics has been compiling/releasing the index of industrial production for the State of Rajasthan on monthly/annual basis since 1971.

In the first series, 1970 was the base year for compiling the IIP both by the Central Statistical Organization & Directorate of Economics and Statistics, Rajasthan. A Working Group was constituted under the chairmanship of Dr. Sumitra Chaudhuri, former Member, Planning Commission, for evolving the methodology for compilation of all-India Index of Industrial Production (IIP) with the new base year 2011-12. The report of the Working Group (WG) was submitted to the Government of India in April 2014.

The specifications with regard to the drawing of the item basket and weighting diagram as recommended by the WG have been elucidated below as guidelines for framing the IIP for States/ UTs with base year 2011-12.

The recommendation of the Technical Advisory Committee on comparable index of Industrial Production are examined by the Central Statistical Office (CSO), Govt. of India and the guidelines on compilation of State level Index of Industrial Production are prepared. According to criteria laid down in the guidelines issued by Central Statistical Office, the Directorate of Economic and Statistics Rajasthan selected the items basket and prepared the weighting diagram for preparation of comparable State Level Index of Industrial Production with 2011-12 as base year.

Base year and frequency

Since the base year for all-India IIP in the new series has been revised to 2011-12, it is advisable for the States/ UTs to adopt the same base in order to maintain comparability with the all-India figures as well as inter-state comparability.

The frequency of releasing the IIP should preferably be monthly. If bringing out a monthly IIP is not feasible in the initial stages, a quarterly IIP should be published with extra efforts being made to sensitize the factories and increase response rates and their frequency in order to shift to a monthly IIP as soon as possible.

METHODOLOGY

1. COVERAGE IN STATE IIP

Three major sectors

- ♦ Mining and Quarrying
- ♦ Registered Manufacturing
- ♦ Electricity

2. SELECTION OF ITEM BASKET FOR MANUFACTURING SECTOR:

2.1 ITEM BASKET

The scope of IIP constitutes the mining, manufacturing and electricity sectors. Out of the three sectors, mining and electricity are in the form of a composite index.

In case of the index for the *Mining sector*, the item basket as well as the weights are decided and provided by the Indian Bureau of Mines (IBM) to the States/ UTs. IBM supplies a composite index in regard to the items prevalent in the mining sector on the basis of data provided by the mines in the respective states.

For the *Electricity sector*, the electricity generation figures (single item) may be obtained by the Central Electricity Authority (CEA).

In case of the *Manufacturing sector*, the basis for selection of item basket is the GVO figures for products from the Annual Survey of Industries (ASI) 2011-12.

It has been noticed that in the production data of ASI, many products correspond with more than one industry groups (NIC 3-digit level) with varying unit values. This seems to be happened due to the practice of classifying NIC of the factory by the major product manufactured in the factory. It is established that the NIC group in which the product's maximum value occurs is the most correct industrial grouping of the product. Thus for selection of the item basket, a product which gets aligned to more than one NIC groups, has been taken in that particular NIC (3-digit) group in which it has maximum value of output. Thus the methodology proposed for the construction of state-level IIP is as below:

- Using the ASI 2011-12 production data pertaining to NIC 10 to 32 the first job is to remove 'other products and by-products' from all the industry groups after re-distributing their values over the rest of the products occurring in the respective industry groups (NIC 3 digits).
- Subsequently, each product (7-digit NPCMS) is placed in alignment with a particular industry group (NIC 3-digit level) in which the product's maximum GVO occurred, leaving with a unique product description, its NPCMS code, its maximum value occurring over the complete dataset and the industry group pertaining to the maximum value.
- From the list stated above, the product descriptions at the 7-digit level of the NPCMS corresponding to not-elsewhere-classified (n.e.c.) products are removed and the contributions of all such products in a particular industry group are re-distributed among the non-'n.e.c.' products. This is done to avoid ambiguity of description as well as to facilitate easy identification and collection of data pertaining to these items from the factories.
- The list of products thus obtained is arranged in descending order of value of output within each 3-digit level of NIC and then starting from the highest contributor, all the products are to be selected till total value of output of the selected products becomes at least 80% of the total value of output at each 3-digit level.

2.2 WEIGHTING DIAGRAM:

For the purpose of compilation of State IIP, three Major Industrial Sectors namely (i) Manufacturing (ii) Mining and Quarrying and (iii) Electricity (Excluding Gas) were considered. The proportions of value of output for these sectors were converted in to sector weights, such that their total equals 1000. The value of output figures for the manufacturing sector were taken from the ASI Detailed Results 2011-12 which were supplied by CSO whereas the value of output figures for the Mining and Quarrying and Electricity sectors were supplied by IBM, Nagpur and CSO respectively.

The total weight of the manufacturing sector (Registered and Un-Registered) was apportioned among the 2-digit industry groups in proportion of their value of output available from the detailed results of ASI 2011-12

As regards Mining and Quarrying Sector its weight was apportioned to the items included in the item basket in proportion to their value of output. Since Electricity sector is a single sector, no apportioning of weight is required.

2.3 SELECTION OF FACTORIES:

Once the item basket for a State/UT has been derived, the list of factories under an item may be selected by considering complete list of factories having a substantial combined/aggregate share (at least 25%),¹ of production of the item in the State/UT from ASI 11-12 data. All endeavor should be made to provide a reserve list of factories at item level.

2.4 SOURCE OF DATA:

For preparation of the Current Series (Base Year: 2011-12) of index of Industrial Production, for Rajasthan, initially 314 industrial units have been selected for collection of production data in respect of 156 items. The base year (2011-12) production data in respect of the selected items have been supplied by C.S.O. on the basis of 2011-12 schedules made available by NSSO. The monthly data of the production for the subsequent period i.e. from.

2001 onwards is being obtained directly from the Industrial Units. The source of Mining Sector data is the Indian Bureau of Mines, Nagpur and for the Electricity Sector generation figures furnished by the Central Electricity Authority through C.S.O.

2.5 METHOD OF CALCULATION OF IIP:

The monthly Index of Industrial Production is calculated as Weighted Arithmetic Mean of the production relatives in respect of selected items as follows:

$$I = \frac{\sum R_i \times W_i}{\sum W_i}$$

Where I is the index, R_i is the production relative of item i th and W_i is the Weight allotted to it.

The production relative (R_i) of i th item for the month has been calculated by using the following formula:

$$R_i = \frac{P_{ic}}{P_{io}} \times 100$$

Where P_{ic} = Production of i th item in the current month,

P_{io} = Production of the i th item in the base month.

Annual Index of Industrial Production is calculated as arithmetic average of monthly indices.

ALLOCATION OF WEIGHT

(BASE YEAR 2011-12)

A: Allocation of weight

S. No.	2-Digit Level of NIC 2008 manufacturing sector	WEIGHT
1	10	21.58
2	11	38.61

General Review & Growth

GENERAL REVIEW of IIP 2017-18

1. GENERAL PERFORMANCE

The General index of Industrial Production stood at 133.08 during 2017-18 as against 122.11 in 2016-17 there by registering a positive of 8.98 percent. During the year 2017-18 the General Index stood at highest with 142.61 in March, 2018 and in July, 2017 the index was at its lowest with 127.83.

2. MANUFACTURING SECTOR

The Manufacturing sector index stood at 134.71 during 2017-18 with an increase of 16.42 percent when compared to the previous year. During the year 2017-18 the Manufacturing sector Index stood at highest with 140.29 in March, 2018 and in October, 2017 the index was at its lowest with 128.54.

3. MINING SECTOR

The Mining sector index stood at 132.85 during 2017-18 with an decrease of 1.62 percent when compared to the previous year. During the year 2017-18 the Mining sector index stood at highest with 150.69 in March, 2018 and in April, 2017 the Index was at its lowest with 125.65.

4. ELECTRICITY SECTOR

The Electricity sector index stood at 124.96 during 2017-18 with decrease of 0.29 percent when compared to the previous year. During the year 2017-18 the Electricity sector index stood at highest with 142.89 in January, 2018 and in July, 2017 the index was at its lowest with 100.61.

GROUP-WISE ANALYSIS UNDER MANUFACTURING SECTOR:

1. Manufacture of food products: (10)

The index of Food Products was 112.76 during 2017-18 registering Increase of 17.34 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 130.39 in January, 2018 and in March, 2018 the Index was at its lowest with 93.45.

2. Manufacture of beverages: (11)

The Index of this group was 60.95 during 2017-18 It was registering decrease of 18.67 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 90.29 May, 2017 and in October, 2017 the Index was at its lowest with 40.28.

3. Manufacture of tobacco products: (12)

The Index of this group was 90.69 during 2017-18 registering decrease of 19.76 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 124.86 in August, 2017 and in June, 2017 the Index was at its lowest with 79.34.

4. Manufacture of textiles: (13)

The Index of this group was 124.78 during 2017-18 It was decrease of 0.25 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 135.80 in January, 2018 and in July, 2017 the Index was at its lowest with 110.59.

5. Manufacture of Wearing apparel: (14)

The Index of this group was 109.00 during 2017-18 It was an decrease by 0.23 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 129.50 in January, 2018 and in October, 2017 the Index was at its lowest with 90.64.

6. Manufacture of leather and related products: (15)

The Index of this group was 112.51 during 2017-18 It was an decrease by 8.48 percent when compared to the previous year. During the year 2017-18 the group Index stood at

highest with 123.42 in June, 2017 and in May, 2017 the Index was at its lowest with 74.72.

7. Manufacture of wood and products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials: (16)

The Index of this group was 179.19 during 2017-18 registering an increase of 37.84 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 227.74 in March, 2018 and in April, 2017 the Index was at its lowest with 118.49.

8. Manufacture of paper and paper products: (17)

The Index of this group was 96.25 during 2017-18 registering a decrease of 49.15 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 114.71 in March, 2018 and in July, 2017 the Index was at its lowest with 81.34.

9. Printing and reproduction of recorded media: (18)

The Index of this group was 213.98 during the year 2017-18 registering an increase of 41.13 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 299.93 in March, 2018 and in October, 2017 the Index was at its lowest with 126.82.

10. Manufacture of coke and refined petroleum products: (19)

The Index of this group was 148.88 during 2017-18 registering a decrease of 0.63 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 174.77 in December, 2017 and in October, 2017 the Index was at its lowest with 81.88.

11. Manufacture of chemicals and chemical products: (20)

The Index of this group was 62.36 during 2017-18 registering an increase of 7.50 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 75.24 in December, 2017 and in May, 2017 the Index was at its lowest with 55.30.

12. Manufacture of pharmaceuticals, medicinal chemical and botanical products: (21)

The Index of this group was 50.72 during 2017-18. It was decrease by 28.75 percent when compared to the previous year. During the year 2017-18 the group Index stood at

highest with 72.38 in November, 2017 and in September, 2017 the Index was at its lowest with 24.67.

13. Manufacture of rubber and plastics products: (22)

The Index of this group was 109.20 during 2017-18 It was an increase by 14.47 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 121.60 in July, 2017 and in November, 2017 the Index was at its lowest with 90.23.

14. Manufacture of other non-metallic mineral products: (23)

The Index of this group was 95.54 during 2017-18 registering increase by 1.94 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 108.14 in March, 2018 and in July, 2017 the Index was at its lowest with 85.35.

15. Manufacture of basic metals: (24)

The Index of this group was 124.28 during 2017-18 registering increase of 4.78 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 141.90 in December, 2017 and in June, 2017 the Index was at its lowest with 106.89.

16. Manufacture of fabricated metal products, except machinery and equipment: (25)

The Index of this group was 156.45 during 2017-18 registering an increase of 33.23 percent when compared to the previous year. . During the year 2017-18 the group Index stood at highest with 192.88 in April, 2017 and in October, 2017 the Index was at its lowest with 119.03.

17. Manufacture of computer, electronic and optical products: (26)

The Index of this group was 268.88 during 2017-18 registering increase of 31.72 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 406.93 in November, 2017 and in July, 2017 the Index was at its lowest with 150.43.

18. Manufacture of electrical equipment: (27)

The Index of this group was 165.61 during 2017-18 registering an increase of 14.70 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 203.39 in April, 2017 and in July, 2017 the Index was at its lowest with 132.78.

19. Manufacture of machinery and equipment n.e.c: (28)

The Index of this group was 188.60 during 2017-18 registering increase of 13.12 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 244.12 in November, 2017 and in August, 2017 the Index was at its lowest with 153.79.

20. Manufacture of motor vehicles, trailers and semi-trailers: (29)

The Index of this group was 218.81 during 2017-18 registering an increase of 36.48 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 243.21 in September, 2017 and in December, 2017 the Index was at its lowest with 176.70.

21. Manufacture of other transport equipment: (30)

The Index of this group was 268.94 during 2017-18 registering increase of 11.14 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 306.23 in May, 2017 and in October, 2017 the Index was at its lowest with 211.01.

22. Manufacture of furniture: (31)

The Index of this group was 174.37 during 2017-18 registering an decrease of 5.88 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 225.74 in November, 2017 and in January, 2018 the Index was at its lowest with 126.07.

23. Other manufacturing: (32)

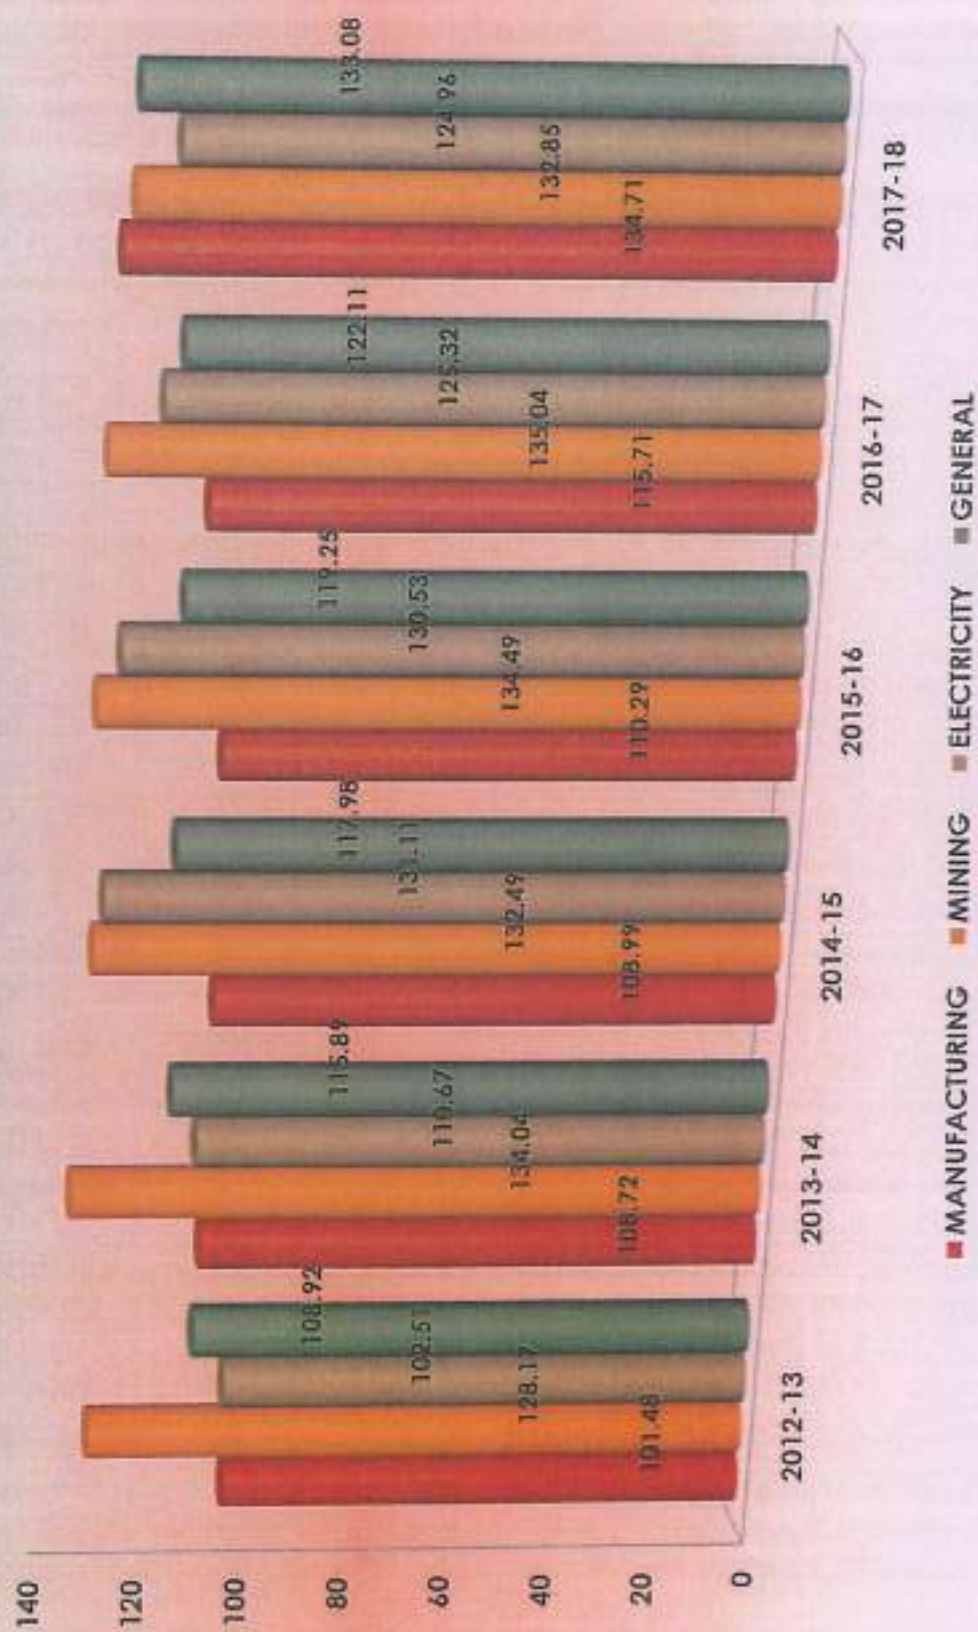

The Index of this group was 136.45 during 2017-18 registering increase of 9.83 percent when compared to the previous year. During the year 2017-18 the group Index stood at highest with 163.03 in August, 2017 and in December, 2017 the Index was at its lowest with 102.34.
